Blast Modelling – Current and Future Directions
Hybrid Finite-Discrete Element Modelling of Rock Failure Process in Dynamic Brazilian Disc Test — H M An, H Y Liu and X G Wang

JWL Parameters for Civil Explosives — R Castedo, J A Sanchidrián, L M López, P Segarra and A P Santos

Smoothed Particle Hydrodynamics Modelling of Blast-induced Fracture Processes in Naturally Jointed Rock Medium — D Deb and R Pramanik

A Methodology for Rock Mass Characterisation to Control Blast-induced Vibrations — E Hamdi and A Karrech

Numerical Simulations of the Explosion on the Steel Beam Using Autodyn Software — A Hosseinzadeh Barforooshi, M Taji and A Abedi

Comparison of the Generation of S-waves During Rock Blasting Simulation with Different Numerical Models — Y G Hu, W B Lu, Q D Gao and M Chen

An Inversion Method for the Prediction of Peak Particle Velocity in Tunnel Blasts — M L Lawlor-O’Neill and A T Spathis

Modelling of Rock Materials Subjected to Dynamic Loading Using a Particle-based Numerical Manifold Method — X Li, Q B Zhang and J Zhao

The Median versus the Mean Fragment Size and Other Issues with the Kuz-Ram Model — F Ouchterlony

Evaluating the Inclusion of the Implementation Variability into Fragmentation Modelling — H Parra and D Zenteno

Modelling Full-scale Blast Heave with Three-dimensional Distinct Elements and Parallel Processing — D S Preece, A Tawadrous, S A Silling and B Wheeler

Underground Stope Drill and Blast Designs Optimisation Program — D Roy and T Williams

Characterising Rock Mass Properties for Fragmentation Modelling — A Scott and I Onederra

Comparison of Experiment and Simulation of Blast Loading on the Steel Beam — M Taji, A Hosseinzadeh Barforooshi and A Abedi

A Multiple Blasthole Fragmentation Model – Its Concept, Formulation, Capability and Field Comparison Examples — R Yang

The Wedge Theory of Borehole Charge Design for Bench Blasting and its Numerical Simulation — J Yang, Z-Y Chen, Q Yu and G Ren

Blast-induced Damage – Models, Measurements and Control
Reducing Crest Loss at Barrick Cowal Gold Mine — R Battison, S Esen, R Duggan, K Henley and P Dare-Bryan

Dynamic Displacements from a Blast-triggered Seismic Event — D P Blair

Numerical Simulation on Dynamic Responses of Steel Concrete Steel Composite Slab under Blast Loading — L Y Chi, J Yang, Z-X Zhang and X Z Peng

Measured and Modelled Response of a Multi-story, Urban Structure to High-frequency Blasting Excitation — C Dowding, C Aimone-Martin and P Abeel

Stope Blast Vibration Analysis at the Dugald River Underground Mine — R Hassell, E Villaescusa, R de Vries and J Player

Evolution of New Damage Criterion for Estimating Blast-induced Damage on Underground Mine Structures Due to Surface Blasting Carried in Neighbouring Mines — A K Jha and D Deb

Fracture Behaviour of Selected Rocks in Single-hole Blasting Studies – A Review — B Mohanty

Effect of Near-field Blast Vibrations on Green Shotcrete in Tunnels and Caverns — M Ramulu and M Gurharikar

Simulation of Damage Zones Induced by Destress Blasting — A Sainoki and H S Mitri

Influence of Blasthole Delay-timing on Fragmentation as Well as Roughness of and Blast Damage behind a Remaining Bench Face through Model-scale Blasting — P Schimek, F Ouchterlony and P Moser

Evaluating the Effects of Non-coaxial Charges for Contour Blasting — J Seccatore, F Golin, M Cardu, E Munaretti, J Bettencourt and J Koppe

Dynamic Stability Analysis of Rock Slopes by the Distinct Element and the Extended Finite Element Methods — M Sharafisafa, A Mortazavi and Z Aliabadian

Study of Blast-induced Damage Away from Blast Points in an Open Pit Mine — A Siamaki, K Shahriari and H Khoshrou
Protection of Underground Mine Structures Due to Adjoining Open Pit Mine Blasting — P K Singh, M P Roy, R K Paswan, L S Shekhawat and A Joshi

Development of Evaluation Model of the Bench Floor and Toe Condition to Optimise the Open Pit Mine Blast — M Taij and M Jahani

A Simple Correlation to Compute Extent of Rock Mass Damage Induced by Blasting in Tunnelling — H K Verma, N K Samadhiya, M Singh, V V R Prasad and R K Goel

Blasting Impacts on Downstream Processes

Study of the Effect of Blast Pattern Design on Autogenous and Semi-autogenous Mill Throughput at Gole Gohar Iron Mine — A Hakami, H Mansour, M A Ebrahim Farsangi, M R Dehghan and F Faramarzi

A Simple Technique for Using High Energy in Blasting — S J Hawke and L A Dominguez

Importance of Blast Design and Implementation Quality for Mine to Mill Throughput Improvement at Ban Houayxai Mine — L Kennelly, E J Sellers, G McNamara, D Symonds, S Kanchibotla and J Gaunt

Improving Drive and Pillar Stability through Efficient Development Mining Design and Blasting Practices — P Klaric

Blast Fragmentation Impacts on Downstream Processing at Goldfields Cerro Corona — D La Rosa, K Caron, W Valery, R Diaz and H Maman

Developments in Grade Control Blasting for Surface Mines — T Little and D Thornton

The Effects of Blasting Performance on the Downstream Operations of a Small Quarry — T Marin, E Melo, J Seccatore, M Cardu, F Galvao, A Rezende, J Bettencourt and G De Tomi

Influence of Velocity of Detonation of Bulk Emulsion Explosive on Fragmentation of Blasted Muckpile — A Mishra, M Rout, D R Singh and S Jana

The Relationship between Blasting Parameters and Muckpile Configuration — S P Singh and D Van Doorselaere

Blasting Solutions for Challenging Environments and Geology

Effects of Joint Intensity on Rock Fragmentation by Impact — S Aziznejad and K Esmaeili

Adjusting Initiation Direction to Domains of Rock Mass Discontinuities in Aitik Open Pit Mine — A Beyglou, H Schunnnesson, D Johansson and N Johansson

Integrated Solutions for Optimised and Environmentally-controlled Blasts — S Bhandari, A Bhandari, R Bhandari, C P Parihar and R Garg

Geological Modelling and 3GSM System to Improve Blast Fragmentation — J C Koppe, R Schaarschmidt, I Pablos, E Gabriel, A Gomes and P Crispim

Close Range Blasting in Adverse Geotechnical Conditions — T Lewandowski, K Nguyen, N Doulai and L Claassens

Blasting Parameters and their Influence on the Stability of Geotechnical/Faulted Restriction Zones — N Salvador, J Vergara, C Muñoz and D Avilés

An Integrated Approach to Protection of Pit Slopes from High-energy Blasting at Ban Houayxai Mine — E J Sellers, G McNamara, B Adiyansyah, L Julian, L Kennelly, S Kanchibotla and J Gaunt

Case Studies/Practical Solutions to Real-world Problems

Determination of Swell Factor Using Terrestrial Laser Scanner — A H Deliormanli, M V Ozdogan, H Yenice, G Turan, D Karakus and T Ongen

Dilution, Ore Grade and Blast Movement Calculation Model — J F D Domingo, F S Leite, V G Mirada and I C Carrasco

Muckpile Shaping for Draglines and Dozers at Surface Coal Mines — S Esen and M Nagarajan

Wall control by 'Masking' or Reversing Initiation Sequence Blasting — A Marton

Should the Blast Exclusion Zone be based on a Qualitative or Quantitative Analysis? — A Practical Implementation Conundrum — K Muller and T Oosthuizen

Managing Coal Loss Using Blast Models and Field Measurement — M Nagarajan, A Green, P Brown and P Dare-Bryan

Estimating Analysis of Bench Slope Face Profile and Bench Blasting Parameters — T Ongen, G Konak, D Karakus, A H Onur and A H Deliormanli
Safety Concerns of Ancient Temple Due to Blasting in Adjacent Mines — P Pal Roy, C Sawmliana and R K Singh

Optimum Use of Explosive Energy through Stemming Material Stabilisation — G Pradhan and S Kumar

Establishing Design Parameters of Control Blast for Long-term Stability of Hang Wall at Rampura Agucha Mine — P K Rajmeny, R Shrimali, L S Shekhawat and A K Joshi

Controlled Blasting for Rock Excavation in the Heart of a City for Metro Rail Construction Project in India — M Ramulu and A Sinha

Causes of Annoyance to Residents in Quarry Environments in France — A C Sauvage

A Novel Blasting Technique to Create Drawbells and Eliminate the Undercut Level in Block Cave Mining — A Tawadrous and D S Preece

What is Relative About Energy? — A Torrance and A Scott

Understanding Five Key Leverage Points to Manage the Blast Fragmentation — S St J Tose

Problems Arising During Underground Openings (Tunnels) in Soft Rocks of Himalayas in Arunachal Pradesh, India — A Case Study — S K Tripathi and M Singh

Soft Computing Approach to Predict Blast-induced Flyrock — R Trivedi, T N Singh, N Gupta and S Bhandari

Impact of Bench Height on Productivity and Other Parameters — A Case Study with Respect to Bench Height — M Uttarwar and S Vairagare

Geophysical Techniques Applied to Blasting Design — A L Vieira and J C Koppe

Application of Lateral Crater Test in Open Pit Blasting Parameters Optimisation — Y M Wang, W Z Liu, X L Zhang and L F Li

Enlightenment of ‘May 20’ Explosion Accident — X H Xie, L Wang and H S Zhou

Dynamics of Rock Blasting

Simulation Analysis and Test of Structure Parameters of Dual Shaped and No-coupling Charge in Large Diameter Holes — L J Guo, D N Zhang, L Li, A P Fei and X F Ma

A New Physical Explanation to the Variation of the Peak Particle Velocity with the Burden and Three New Hypotheses about How the Blasthole Senses its Physical Surrounding at Detonation — A P Rustan

The Response of Rock Materials to One-dimensional Shock Loading — Q Zhang and J Zhao

Experimental Study of Obliquely Incident Plane P-Wave Propagation across Rock Fractures — Y Zou, J C Li and J Zhao

Economics of Blasting – Production, Technology and Environment

Expansion of Mineral Production under Energy Constrained Conditions — N Djordjevic

A Holistic Approach to Managing Blast Outcomes — T Goswami, E Martin, M Rothery and D Genge

Blasting Approaches to Increase Mine Productivity and Reduce Greenhouse Gas Emissions in Surface Coal Mining — T Goswami and G Brent

Evaluation of Blast Operation and its Relation to Production Performance and Costs in the Sarcheshmeh Copper Mine — A Nikkhah and M Taji

Potential of Overburden Cast Blasting Technique in Indian Surface Coal Mines — A Modular Approach and its Financial Implications — M D Uttarwar and R R Yerpude

Innovative Blast Measurement Technologies

High Speed Video – An Essential Blasting Tool — D Aldermann, D Chalmers, C Martin and S Wellink

Measurement and Assessment of Bulk Explosive Products — G Cavanough, A Torrance and J Rock

Reducing the Effect of Wind on Airblast Measurement During Blasting — K Henley

Transfer Function – New Method to Accurately Predict Resonant Frequencies of a High Wall — R Osterman
Design of Equipment for Dynamic Burden Measurements — N Petropoulos, D Mihaylov, D Johansson, M Wimmer and A Nordqvist

Effect of Dynamic Pressure on Timing of Electronic Detonators — G Teowee, B Papillon, H Solis and R Ibarra

Management/Control of Vibrations, Airblast, Dust and Fumes
Understanding the Physical and Detonation Characteristics of Bulk Explosives to Minimise Post-blast Fume Generation in Deep Hole, Soft Ground and Wet Conditions — L Julian, A Musunuri, E Sellars and S Kanchibotla

Reducing Vibrations in Large Iron Ore Mine Nearby Urban Area — J C Koppe, C M Rezende and A Gomes

Management of Blasting in Weak and Narrow Manganese Deposits of MOIL for the Improvement in Safety and Productivity — G Manekar, K R Magre, A K Jha and G P Kundargi

Scientific Evaluation of Fauna Sensitivity to Blasting — D A Martin

Blasting Harmonics and Controlling Peak Particle Velocity — A J Moore and A B Richards

Quality of Vibration Measurements on Rock – The Impact of Some Coupling Methods — P Segarra, J A Sanchidrián, R Castedo, L M López and I Del Castillo

New and Practical Initiatives in Blasting Safety
The Chemical Factors of Explosives Used in the Mines, Quarries and Tunnels in Slovakia — V Bauer and M Bacior

A Fundamental Review of Factors Influencing Reactive Ground in Bulk Emulsion Explosives — F Beach, K Robinson, G Rigby, B Evans and D Wilkinson

An Automated System for Flyrock and Fume Monitoring of Blasts — I Kharitonenko, C K McKenzie, B E Papillon and P Popov

Novel Explosives and Initiation Systems
Particular Qualities of Detonation of Vertical (Slanted) Charge of Emulsion Explosive, Sensitised by Gas — S A Gorinov and I Y Maslov

Physical and Technical Justification of Application of the Low-density Emulsion Explosion with the Sparing Explosion — S A Gorinov and I Y Maslov

Detonation and Breakage Performance of a Hydrogen Peroxide-based Explosive Formulation — I Onederra and M Araos

Deflagration to Detonation – Transition of Explosives without the Effects of Shock Waves — X H Xie, K Xu and H S Zhou

Emulsion Explosives Containing Catalytic Metal Ion — X H Xie, K Xu and H S Zhou

Performance of Emulsion Explosives for Ceramic Oxides — X Xie, X Li, S Yan, W Huang, W Wang and J Guo

Parameter Determination of an Ignition and Growth Model from Emulsion Explosive Tests — C Yi, U Nyberg and D Johansson

Recent Research and Development in Surface and Underground Rock Blasting
Megablasts – Enabling Technologies in BHP Billiton Iron Ore — B Green

A Diagnostic Technique for Assessment of Production Blast Designs in an Underground Mine — B Mohanty and D Zwaan

Massive Blasting in Chuquicamata Mine — S S Parra and V H S Uriol

Benefits Related to Applications a Mass Blast in Open Cut Mining — J Vergara, C Muñoz and N Ortega

A New Technology for Digital Drilling and Automatic Lithology Identification — D Yun, X Dai-Yu, Y Lu and W Feng-Jun
Rock Fragmentation – Models, Measurements and Control
A Novel Rapid and Accurate Three-dimensional Ore-waste Boundary Tracking System — K R Blay, A T Spathis and K E Leslie

Prediction of Rock Fragmentation Using a Gamma-based Blast Fragmentation Distribution Model — F Faramarzi, M A Ebrahimi Farsangi and H Mansouri

Influence of Distorted Blasthole Patterns on Fragmentation as Well as Roughness of and Blast Damage behind Remaining Bench Face in Model-scale Blasting — R Ivanova, F Ouchterlonly and P Moser

Comparison of Empirical Fragmentation Models — M Jahani and M Taji

The Effect of Delay Time on Fragmentation Distribution through Small- and Medium-scale Testing and Analysis — P D Katsabanis and N Gkikizas-Lampropoulos

Directional Blasting Rock Cutting Technology — W Z Liu, X L Zhang, H T Yang and Q Q Shi

Evaluation of a New Vision System Algorithm for Automated Fragmentation Measurement from a Shovel — M J Noy

Effects of Specific Charge and Electronic Delay Detonators on Fragmentation in an Aggregate Quarry, Building KCO Design Curves — F Ouchterlonly, U Nyberg, M Olsson, K Widenberg and P Svedensten

How Far Can You Stretch the Size Distribution of Rock Fragments? — J A Sanchidrian

The Influence of Charge Distribution on the Grindability of the Blasted Material — J Seccatore, G Sadao, M Cardu, F Galvao, L Finotti, A Rezende, J Bettencourt and G De Tomi

New Methodology for Determining Iron Ore Size Distribution — C R Silva, V C G Souza and J C Koppe

Blast Design Parameters and their Impact on Rock Fragmentation — P K Singh, M P Roy, C Drebenstedt and B Prasad

Blast Fragmentation Measurement Based on 3D Imaging in Sublevel Caving Draw-points and LHD Buckets at LKAB Kiruna — M J Thurley, M Wimmer and A Nordqvist

Concept of Calculating the Parameters of Rock Breakage by Blast for Underground Mining Technologies — S D Victorov, V M Zakalinsky and A A Osokin

Analysis of Rock Fragmentation and its Effect on Gravity Flow at the Kiruna Sublevel Caving Mine — M Wimmer, A Nordqvist, E Righetti, N Petropoulos and M Thurley

Discrete Element Modelling of Blast Fragmentation of a Mortar Cylinder — C Yi and D Johansson

Specialised Blasting Methods for Civil Works and Other Applications
Controlled Blasting for Twin Tunnels with a Shallow Cover under an Operating Railway Line G Gopinath — H S Venkatesh and R Balachander

Mist Diffusion Experiment and Evaluation of Water Tube for Blasting Demolition Dust Control — Y H Ko, J K Kim, Y S Noh, H Park, H S Kim, S H Cho and H S Yang

Full-scale Blast Tests of Masonry Walls — L M Lopez, P Segarra, R Castedo, J A Sanchidrian, J Navarro, A P Santos and M Chiquito

Controlled Blasting for Deconstruction of a Railway Bridge near Sahibganj — S K Mandal, A K Ghosh and S Oraon

Large-scale Controlled Blasting in Proximity to Urban Structures — G C Vaneen, R Balachander, H S Venkatesh and G Gopinath

Short Burden Blasting — A New Method for Barrier Breakage in River Diversion Works — M M Singh, N K Bhagat and R S Yadav

An Innovative Approach of Spacer Design for Air Deck Technique Applied in Indian Conditions — N R Thote and D P Singh
